SUBJECT: Supplemental materials to license amendment
request: Preparation and Transport of Unit Doses

Dear Bruce:

I enclose additional supplemental material pertaining to the license amendment request dated November 8, 1981.

This material has been prepared in response to a telephone conversation of January 25th, 1982.

I wish to bring to your attention that I am requesting that three (3) radioisotope licenses be amended. The primary one is that held by Boone Hospital Center in Columbia, Missouri. This is License Number 24-01565-01. In addition, and by means of the enclosed materials, I request that the license issued to Columbia Regional Hospital, License Number 24-16281-01 be amended to permit isotope sharing. Also, I wish to request that License Number 24-18695-01, held by Moberly Regional Medical Center, Moberly, Missouri, be amended to permit them to receive unit doses from Boone Hospital Center. The enclosed supplemental material includes a letter concurring with this request and with the necessary procedures to accomplish sharing and/or delivery of unit doses, from each of the hospitals involved.

If you require additional information, please call me at Boone Hospital Center, 314-875-3389.

CONTROL NO. 05947

The hospital administrators involved in this relationship have authorized me to request this amendment.

Sincerely,

A. H. Emmons
