MEMORANDUM FOR: H. D. Rose, Resource Management Branch, Executive Office
for Management and Analysis, IE

FROM: E. L. Jordan, Assistant Director for Technical Programs,
Division of Reactor Operations Inspection, IE

SUBJECT: PURCHASE OF SERVICES FOR PIPING INTERFERENCE ANALYSIS

We would like to obtain the services of Computerized Interference
Elimination thru Parameter or the successor to the Parameter contract.
Task order information is enclosed.

Edward L. Jordan, Assistant Director
for Technical Programs
Division of Reactor Operations Inspection

Enclosure: As stated

CONTACT: ✓ R. W. Woodruff, TP

TASK ORDER INFORMATION

1. Scope of Work

Obtain the services of Computerized Interference Elimination, Inc. (CIE) to analytically examine a power reactor system's space for potential piping interferences. The reactor and the space will be selected by IE.

2. Objective of Task

Areas within the space where potential piping interferences are indicated will be subject to physical inspection. The actual configuration can then be compared to the input to the seismic analysis for safety-related piping.

3. Statement of Work

IE will arrange for a licensee to submit engineering drawings for the selected space (50,000 to 75,000 cubic feet) to CIE. CIE will perform an interference analysis per the attached proposal (letter from CIE dated May 1, 1980).

4. Reporting Requirements and Other Deliverables

Sketches showing each interference or a statement that there are no interferences.

5. Desired Completion Date

Forty-five days after receipt of drawings.

6. Special Instructions or Requirements

All drawings are to be returned to the licensee.

7. Place of Performance

CIE's offices.

8. Maximum Cost Limitation

\$9,500
