NOTICE OF VIOLATION

Caterpillar Tractor Company

License No. 12-00013-06

As a result of the inspection conducted on June 18, 1985, and in accordance with the General Policy and Procedures for NRC Enforcement Actions, (10 CFR Part 2, Appendix C), the following violations were identified:

1. 10 CFR 20.201(b), requires that you make such surveys as may be necessary to comply with all sections of Part 20.

Contrary to this requirement, you failed to make such surveys as were necessary to assure compliance with 10 CFR 20.301, a regulation that describes authorized means of disposing of licensed material contained in waste. Specifically, hydraulic hose, containing chromium-51 labeled tape has not been surveyed prior to disposal in a landfill since license issuance.

This is a Severity Level IV violation (Supplement IV).

2. License Condition No. 22 requires that licensed material be possessed and used in accordance with the statements, representations, and procedures contained in certain referenced documents. The referenced April 23, 1985 application states that records of instrument surveys and wipe tests, performed after chromium-51 use, will be maintained.

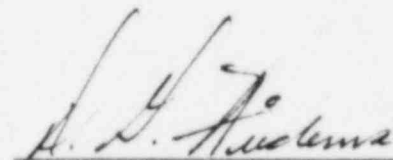

Contrary to the above, records of instrument surveys and wipe tests performed after chromium-51 tape fabrication in Room 208 were not maintained from April 1985 to the present.

This is a Severity Level V violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
