SUBJECT: NRC INSPECTION REPORT 50-382/96-08

Dear Mr. Sellman:

On September 9-20, 1996, the NRC completed an inspection at your Waterford Steam Electric Station, Unit 3, facility. The enclosed report presents the scope and results of that inspection.

The inspection included an evaluation of applicants for operating licenses and a review of the licensed operator requalification program. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. The results of this inspection are documented on pages 2 and 3 in the enclosed report.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

  
Kenneth E. Brockman, Acting Director  
Division of Reactor Safety
