

HATBORO, PA.

May 30, 1985.

MR. ROBERT E. MARTIN, PROJECT MGR.,  
Office of Nuclear Reactor Regulation,  
U. S. Nuclear Regulatory Commission,  
Washington, D. C. 20555.

Dear Mr. Martin:-

Congratulations to the Commission on its ruling to  
start the Three Mile Island reactor!

There are some people who are bent on destroying the  
nuclear industry in America. Through false statements and  
the employment of sabotage they have been successful in  
slowing the nuclear industry to a half step, when the U. S.  
was the leader in that field. Even today, the foreign  
countries get their parts to build reactors from the U. S.

Billions of dollars of the tax payers dollars have  
been wasted by their fruitless delays and opposition. The  
Jane Fondas are still opposing the United States' efforts  
to promote the advancement of our people, as Jane did when  
she went over to Hanoi during the Vietnamese war and en-  
couraged our enemies, and caused a stalemate, and the death  
of many thousands of the people there as they fled to the sea  
and died at sea, rather than live under the red flag.

It was such an encouragement to find the Commission  
with a go-ahead signal to the safest and cleanest form of  
energy yet known to man, there at the Three Mile Island, which  
should have been started years ago, so we the people might  
have cheaper and better ways of securing our electricity.

Thanks so much!

Sincerely,

*Alvin J. Paine*

REV. ALVIN J. PAINE.
