Re: License #13-15933-01 Control No. 77675

Dear Sir:

Our license renewal has been submitted and has received Control No. 77675. Regarding Item 19, Therapeutic Uses of Pharmaceuticals, we wish to specifically state here that the procedure "Nursing Personnel who attend the patient will wear personal monitoring devices as advised by the Radiation Safety Office" (per Licensure Guide Appendix K) will be followed. The Radiation Safety Office will determine when monitoring is required based on room surveys, the exposure rate at 3 meters, and NRC regulations and guidelines. For P32 cases film badge monitoring of the nurses will routinely not be used.

From:

Frances L Moser

Frances L. Moser, PhD.
Radiation Safety Officer
