Application of RAMONA-3B to BWR ATWS\*  
(FIN No. A-3273)

P. Saha, Group Leader  
LWR Code Assessment and Application Group  
Department of Nuclear Energy  
Brookhaven National Laboratory  
Upton, New York 11973

\* Work performed under the auspices of the U.S. Nuclear Regulatory Commission.

An interfacing program that takes the CASMO data and turns it into a file that can be read by another program which will generate the RAMONA-3B cross sections has also been developed. Finally, the TVA data for the three-dimensional exposure and void history of the Browns Ferry, Cycle 5, core have been read and tested so that the generation of the RAMONA-3B cross sections can begin as soon as all CASMO calculations are finished.
