NO. 10

April 22, 1985

Mr. James G. Keppler
Regional Administrator
U.S. Nuclear Regulatory Commission
799 Roosevelt Road
Glen Ellyn, IL 60137

Subject: Dresden Station Units 1, 2 and 3
Response to IE Inspection Report
Nos. 50-010/85-003, 50-237/85-007,
and 50-249/85-006

Reference: W. L. Axelson letter to Cordell Reed
dated March 26, 1985.

Dear Mr. Keppler:

Enclosed in the form of Attachments to this letter is our response to the two items of noncompliance and one "Item of Concern" identified in the subject inspection reports conducted by Ms. G. M. Cristoffer and Mr. T. J. Madaea of your office on February 19-22, 1985 at the Dresden Nuclear Power Station.

Attachment A provides our response to the two items of noncompliance and Attachment B addresses the Items of Concern.

It should be pointed out that Commonwealth Edison believes the second violation (Level V) is inappropriate on the basis that we feel security personnel and procedures were in compliance with implementation and commitments of the approved Security Plan. A conference call with Messrs. Axelson and Creed from your office and B. Rybak, J. Wujciga, R. Flessner, and B. Saunders from CECO discussed this noncompliance and it was agreed that our position regarding this second noncompliance should be submitted.

Both attachments contain information concerning the Security Plan for a nuclear power station and should be controlled in accordance with the provisions of 10 CFR 73.21.

Very truly yours,

D. L. Farrer
Director of Nuclear Licensing
