AUG 20 1984

MEMORANDUM FOR: Victor Stello, Chairman  
Committee to Review Generic Requirements  
Office of the Executive Director for Operations

FROM: Robert B. Minogue, Director  
Office of Nuclear Regulatory Research

SUBJECT: STAFF RESPONSE TO RECOMMENDATIONS  
MADE AT 68TH CRGR MEETING

At its 62nd meeting on April 25, 1984, CRGR made seven recommendations concerning the proposed decommissioning rule. In my memo to you dated 6/12/84, I indicated that we had modified the rule package to incorporate six of those recommendations. The memo also indicated that we had not revised the rule in response to the recommendation in the area of certification of decommissioning funds and discussed the reasons for not doing so.

At the 68th CRGR meeting on August 8, 1984, the CRGR reaffirmed its recommendation that certification of funds in a prescribed amount be allowed for power reactors. We have revised the rule package to incorporate this recommendation and will send the rule package to W. J. Dircks.
