### ITEM 2.2.2

The staff found that the NUTAC program fails to address the concern about establishing and maintaining an interface between all vendors of safety-related equipment and the utility<sup>1</sup>. Accordingly, the licensee will need to supplement his response to address this concern. This additional information should describe how current procedures will be modified and new ones initiated to meet the elements of this concern.

### RESPONSE

CP&L has reviewed the NUTAC Vendor Equipment Technical Information Program (VETIP) and considers that the NUTAC effort provides effective guidelines in establishing a vendor interface program.

The VETIP as defined in the March 1984 NUTAC document is considered a valid response to Section 2.2.2 of the NRC Generic Letter 83-28. Accordingly, it is requested that the NRC reanalyze and reconsider your request for additional information.
