Dr Nunzio J. Palladino

Chairman, U.S. Nuclear Regulatory Commission
Washington, D.C.

March 30, 1985

FREEDOM OF INFORMATION
ACT REQUEST

FOIA-85-281

rec'd 4/18/85

Dear Dr Palladino,

Under the Freedom of Information Act, I request information on the availability and location for possible inspection of all of the results of concrete cylinder tests and concrete test borings which were made during and subsequent to the construction of the Long Island Lighting Co. Shoreham Nuclear Plant at Shoreham, L.I., New York.

In view of the very serious allegations which were made during the March 24, 1985 television broadcast of the CBS "60 Minutes" Program; I refer specifically to the allegations with regard to the possibility that faulty and substandard concrete may have been poured at the Shoreham Nuclear Power Plant. It therefore seems to me that it is imperative that it be determined whether or not the concrete now in place, particularly the concrete containment installation as well as key foundations, have compressive strengths which are adequate and meet design specifications.

Your help on this matter will be appreciated.

cc: GOVERNOR MARIO CUOMO
KARL GROSSMAN
ED BRADLEY - CBS
JOHN S. HERANSTON - DOE

Sincerely,

Gerard C. Gambs
