Items for October 24, 1996 WOG/NRC Management Meeting

Reference: ESBW/WOG-96-346, "Preliminary Items for October 24, 1996 WOG/NRC
Management Meeting, dated October 1, 1996.

The Westinghouse Owners Group (WOG) Steering Committee met on October 7 & 8. During this meeting an agenda for the October 24 WOG/NRC meeting was prepared. Attached is a copy of the agenda. In addition, the Steering Committee has identified several topics in which they are not planning any presentations but would be interested in obtaining NRC thoughts/concerns. These items are as follows:

- o Risk Informed ISI
- o Shutdown Rule
- o Alloy 600 Reactor Vessel Head Penetration

Also attached is the "prioritized" list of topical reports (WCAPs) submitted to the NRC by the WOG for generic review. The Steering Committee has identified the WCAPs by high, medium, and low priority. The WCAPs were not prioritized in each category and are list by submittal date in each category.

If you have any questions regarding the agenda or WCAP prioritization please call me at (412) 374-6207

Very truly yours,

Andrew P. Drake, Project Manager
Westinghouse Owners Group
