Gentlemen:

Subject: Inspection Report No. 50-213/85-08

A routine safety inspection was conducted by Mr. A. A. Weadock of our office on March 25-29, 1985, of the Haddam Neck Plant radiological environmental monitoring program. Areas that were reviewed included sample collection, control of contractor activities, meteorological monitoring, audits and reports.

The inspection indicated that one of your activities was in apparent violation of NRC requirements. Details are provided in enclosure Appendix A. You are required to respond to this finding by following the instructions included in Appendix A.

Additionally, please document in your response the immediate and long term corrective actions committed to during the exit interview to correct the recurring problem in signal transmission between the meteorological equipment house and the control room, as discussed in Section 6.0 of the enclosed inspection report.

Your cooperation with us is appreciated.

Sincerely,
