Dear Dr. Glenn:

In response to your letter of May 24 to William Lane, I wish to report that on June 18, 1985, the calibration measurements on the teletherapy unit in question will be accomplished. To date, that process was delayed because the necessary equipment from the National Bureau of Standards has not arrived. Once the calibration measurement has been completed, we expect to be in full compliance and will send you a report of that action immediately.

Sincerely yours,

Edward G. George, FACHA
