Geneva, IL 60134

License No. 12-20378-01

Gentlemen:

We have reviewed your letter dated December 27, 1984, requesting an amendment to your NRC Byproduct Materials License No. 12-20378-01 and find that we will need additional information as follows:

1. With regard to Item 2 of your letter, a corrected copy of your license correcting this item was issued on July 29, 1983. An additional copy is enclosed.
2. Please confirm that any changes made to your operating procedures by your Radiation Safety Committee will be of an administrative nature only. Any changes that impact upon the effectiveness of your radiation safety program must be reviewed by the NRC.
3. Please specify the isotope(s) and activity you desire for the transuranics you wish to have added to your license. An entry such as "Any Byproduct Material between Atomic Numbers 90 to 100" would be an acceptable listing of the isotopes you desire. Activity should be specified in millicuries or curies. If the physical form of this material will be something other than as contamination on your COMPACT I, please so state.

We will continue our review of your application upon receipt of this information. Please reply in duplicate, within 30 days, and refer to Control Number 78088.

Sincerely,

Original Signed By  
William J. Adam, Ph.D.  
Materials Licensing Section
