

JUL 09 1985

Docket No. 50-317
License No. DPR-53

Baltimore Gas and Electric Company
ATTN: Mr. A. E. Lundvall, Jr.
Vice President, Supply
P. O. Box 1475
Baltimore, Maryland 21203

Gentlemen:

Subject: Inspection No. 50-317/85-03

This refers to the special safety inspection conducted by Dr. Jin W. Chung of this office on March 4 - 15, 1985 at Calvert Cliffs Nuclear Power Plant, Unit 1, Lusby, Maryland of activities authorized by NRC License No. DPR-53 and to the discussions of our findings held by Dr. Jin W. Chung with Mr. J. Tiernan and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection included systems selected from two accident sequences documented in the Calvert Cliffs probabilistic risk assessment (NUREG/CR-3511). The equipment inspection focused on the availability of critical components as evidenced by plant conditions and implementation of programs to assure operability. In addition, this inspection examined the ability of the Calvert Cliff staff to utilize procedures and equipment to recover from accident sequences. These areas are described in the NRC Region I Inspection Report which is enclosed with this letter.

Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of equipment and simulated activities by the inspector.

Within the scope of this inspection, no violations were observed.

No reply to this letter is required. Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
