

June 28, 1985

Docket Nos. 50-317
and 50-318

Mr. A. E. Lundvall, Jr.
Vice President - Supply
Baltimore Gas & Electric Company
P. O. Box 1475
Baltimore, Maryland 21203

Dear Mr. Lundvall:

SUBJECT: TMI ACTION PLAN ITEM II.K.3.30, SMALL BREAK LOCA ANALYSIS AND
II.K.3.31, PLANT ANALYSIS

By letter dated June 20, 1985, to Mr. R. W. Wells, Chairman, CE Owners Group (CEOG), the NRC found the CEOG submittal, CEN-203, which justified continued acceptance of the CE small break LOCA model (CEFLASH-4AS) in meeting the requirements of TMI Action Item II.K.3.30 to be acceptable. This acceptance, however, is pending a confirmatory benchmark analysis to demonstrate good agreement between CEFLASH-4AS and the data from Semiscale test S-UT-08. By letter dated March 11, 1985, the CEOG committed to the performance of the validation and projected a December 1985 schedule for submittal of a report on this effort.

On June 28, 1985, BG&E also provided a letter referencing the CEOG March 11, 1985 letter and commitment to the validation of the CEFLASH-4AS agreement with the S-UT-08 test. Pending the successful validation of CEFLASH-4AS and based on our understanding that CEFLASH-4AS was used for the Calvert Cliffs Nuclear Power Plant, we find that you have met the requirements of TMI Action Item II.K.3.30 and a plant specific analysis is not required for II.K.3.31. These items are therefore complete. Please advise this office within 30 days of receipt of this letter, or upon unsuccessful validation of the model, if for any reason our understanding is not correct and provide your plans and schedule for completing II.K.3.30 and II.K.3.31.

Sincerely,

(S)
Edward J. Butcher, Acting Chief
Operating Reactors Branch No. 3
Division of Licensing
