Rockville, MD 20852

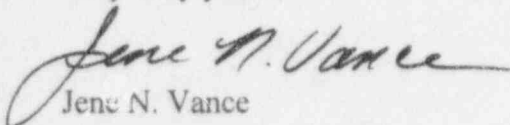

Subject: 3R-STAT Computer Code

Dear Mr. Nelson:

Please find enclosed the 3R-STAT proprietary source listing pages showing the programming changes made for the residual error abort feature. The changes are marked with revision bars and revision numbers. The changes were made to the sub-routines: *RRR.PAS* and *RONEM.PAS*. The *RRR.PAS* sub-routine revision was made on lines 635 through 656 and the sub-routine *RONEM.PAS* revision was made on line 71 and line 519. The sub-routines should be replaced in their entirety located in the 3R-STAT Topical Report, Volume 4, as pagination has been changed. Please match the page numbers with the same page numbers from the previous sub-routines.

If you have any questions on any aspects of these changes, please feel free to give me a call at 505 336-4845.

Very truly yours,

Jene N. Vance
