ABSTRACT (MAY BE CONTINUED ON OTHER SIDE OF PAGE)

The licensee closed his office in November 1994. He gave his employees a six week notice. He was told by the nuclear mod. tech. that two of the other employees were talking about "trashing the office". After the office was moved, the source was not in the pig.

Both the old and new offices were surveyed as well as the grounds around the offices, but no source was found. The licensee thinks the source is in the landfill. If any further information is needed, please contact Joseph Noble (504) 765-0123.

ABSTRACT (MAY BE CONTINUED ON OTHER SIDE OF PAGE)

On September 14, 1996, a call about 2 well logging sources a 7ci Cs137 and a 16ci AmBe, were lost down a well. The sources belonged to Slumberger and were being used in Cutler Oil Field 3 at turn Island, Cameron Parish, LA. The sources are 10940 ft below the surface and will be covered w/ 8999 ft of concrete.
