Gentlemen:

This refers to your letter dated February 21, 1985, which requested amendment to License 12-17503-01. Accompanying your letter was an amendment fee of \$60 pursuant to fee Category 3P.

As indicated in your letter, the NRC License Fee Management Branch is reviewing the fees assessed in fee Category 3N as they pertain to licenses authorizing calibration services. However, until such time a decision is made in that regard, applications for amendment to licenses classified in fee Category 3N are subject to the current amendment fee for that category.

License 12-17503-01 is subject to fee Categories 3N, 3P and 1K. Footnote 1(d) of \$170.31 states, in part, that where the application for amendment is applicable to two or more fee categories, the amendment fee for the highest fee category would apply. Accordingly, your application for amendment should have been accompanied by an amendment fee of \$120 pursuant to fee Category 3N. Please remit the additional \$60 to the U.S. Nuclear Regulatory Commission and mail it to my attention. Upon receipt of the additional fee, your application will be forwarded to the Region III Licensing staff for processing.

We will be in touch with you shortly concerning the fee classification for licenses authorizing calibration services.

Sincerely,

Original Signed by
A. S. Cabell
