

PETROTOMICS COMPANY

TIDEWATER OIL COMPANY * MANAGING PARTNER

P. O. BOX 184 * CASPER WYOMING

February 14, 1962

Mr. Donald A. Nussbaumer, Chief
Source and Special Nuclear Materials Branch
U. S. Atomic Energy Commission
Division of Licensing and Regulations
Washington, D. C.

Dear Sir:

Mr. N. A. Grant requested that I write you and explain my future plans for improving the Petrotomics Company mill tailings dam.

As soon as the weather permits, we will repair and deepen the surface runoff interception ditch around the North side of the pond and we will also dig the planned ditch along the east and south sides of the pond area.

We are now scheduled to start mine stripping on April 2, 1962. As soon as possible after that date, we will raise the present dam at least 10' feet in height along its entire length and extend it at that elevation to natural ground on both ends as is shown on the plan included with the license application.

Very truly yours,

PETROTOMICS COMPANY

By G. T. Beardshear P. E.
Mine Superintendent
