Mr. Richard J. Guimond
Criteria & Standards Division (AMR-460)
Office of Radiation Programs
U.S. Environmental Protection Agency
Washington, DC 20460

Dear Richard,

In response to your April 16, 1985 request, we would be glad to provide data from an UMTRA Project site to support EPA's case study of alternate concentration limits. Based on our review of the sites' data available, we recommend the Riverton site be used by EPA since that data is totally compiled and checked. If EPA believes the Gunnison or another UMTRA site would be preferable, we will accommodate your preference.

Please contact John Thackston of Jacobs Engineering Group at FTS 846-1342 to arrange for receipt of the data required by EPA for its study.

If we can be of further assistance, please contact Kathy Carlson or me at FTS 844-3941.

Sincerely,

John G. Themelis, Project Manager
Uranium Mill Tailings Project Office
