MAR 6 1963

Petroleum Company
P. O. Box 184
Casper, Wyoming

Attention: Mr. W. A. Grant
Project Manager

Gentlemen:

Enclosed is AEC Source Material License No. SUA-551.

Please note that your license is for a one year period only and is scheduled to expire March 31, 1963. Also, the license requires you to conduct radiation safety surveys in accordance with the radiation safety program submitted in your application and supplements thereto. If operations and survey results so dictate, your survey program should be modified as appropriate. Modifications in the direction of additional or more frequent surveys do not require a license amendment. However, any modification which would result in a relaxation or deletion of any aspect of the program required by the license does require a license amendment.

In addition, your license requires that you submit quarterly reports on the results of your radiation safety surveys. The purpose of this condition is to keep us informed of your progress in radiation safety and permit us to act promptly on any requests that you might have in the future. We will also be in a better position to review a renewal request for the normal three year period when the present license expires.

If you should have any questions about this matter, please feel free to contact us.

Sincerely yours,

Original Signed by A. W. [illegible]

R. Lowenstein, Director
Division of Licensing and Regulation
