

MORTON THIOKOL, INC.

Morton Salt Division

January 9, 1985

U.S. Nuclear Regulatory Commission
Material Licensing Branch
799 Roosevelt Road
Glen Ellyn, IL 60137

Reference to License No. 34-18705-01
Program Code 03120

Dear Sir:

Morton Salt's License No. 34-18705-01 is scheduled to expire February 28, 1985. We are not interested in renewing this license, and are presently working with Applied Health Physics Inc. to dispose of this material in a manner authorized in 10CRF Part 20.

At this time, it does not appear that we will be able to dispose of the material in question before the expiration date of our license.

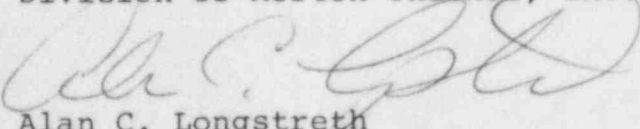

I am requesting that our license be renewed for storage only until the material can be properly disposed. The device is locked and I am in charge of the key and responsible for the equipments integrity.

Once proper disposal has been achieved I will forward the completed NRC Form No. 314 to your office.

If there are any fees required with this request, or there is other information you require, please contact me.

Sincerely,

MORTON SALT
Division of Morton Thiokol, Inc.
