EDLOW INTERNATIONAL COMPANY

Dear Betty:

Please refer to the recently approved license XSOU8748 which authorizes export of thorium dioxide to Japan (copy attached for your review).

As discussed by phone, the supplier of the material - Atomergic Chemetals Corporation - has advised us that the thorium dioxide will be shipped from its facility in California, rather than the New York location listed on the license. There are no other changes to the specifics of the export license.

Atomergic's California address is as follows:

Thorium Dioxide Depot  
11222 Flintcote  
San Diego, California 92121-1215

Please do not hesitate to contact me at (202) 483-4959 should you have questions or comments in this regard. Thank you for your assistance in this matter.

Best regards,

*Melissa Mann*
