Dear Mr. Catchpole:

This letter confirms our February 22, 1983 telephone conversation during which you were notified, based on our review of OPI's June 8 and 25, 1982, and January 27, 1983 submittals supporting an amendment request authorizing mining in Unit No. 2 at OPI's Bison Basin Commercial ISL facility, that the NRC staff determined all required data is submitted and adequate to support issuance of the proposed amendment. The NRC plans to issue the amendment the week of March 7, 1983.

As agreed to in our conversation, the amendment will contain requirements for submittal of all data pertaining to the location, completion, baseline water quality, and UCL's for additional Mining Unit No. 2 monitor wells required by the WDEQ. In addition, all monitoring data and excursion reports submitted to the DEQ for such wells shall also be submitted to the NRC as appropriate.

Sincerely,

Frederick W. Ross
