Docket No. 40-8906

Bokum Resources Corporation
ATTN: Mr. K.E. McCorkle, Mine-Mill Manager
P.O. Box 13958
Albuquerque, New Mexico 87107

Dear Mr. McCorkle:

Thank you for the documents from the State of New Mexico's Environmental Improvement Division dated January 31, 1985, May 20, 1985 and January 6, 1986 to Bokum Resources Corporation extending the license's expiration date. These have been added to your license file.

The USNRC assesses a fee for all routine and special inspections of uranium mills. The NRC did not conduct an inspection of your facility in FY86 because of the very recent assumption of responsibility from the State of New Mexico as well as the fact that Bokum has never operated. However, an unannounced inspection had been conducted on February 12, 1987, (FY 87) requiring a fee as specified by 10 CFR Part 170 (copy enclosed). We believe this answers your question on fees.

Should you have any further questions regarding USNRC Source Material License SUA-1475, please contact Mr. Shopenn, of our office, at (303) 236-2673.

Sincerely,

151

Harry J. Pettengill, Chief
Licensing Branch 2
Uranium Recovery Field Office
Region IV
