DOCKETED

Mr. Samuel J. Chilk  
Secretary of the Commission  
US Nuclear Regulatory Commission  
Washington, D.C. 20555

'85 JUL 12 P3:46

Dear Mr. Chilk:

OFFICE OF NUCLEAR  
DOCKETING & SERVICE  
BRANCH

MATERIAL BALANCE REPORTING  
10CFR PART 40, 70, AND 150  
PROPOSED RULE 10 FR 19695

We have reviewed the proposed rule on the Material Balance Reports and offer the following comment.

Since there will be a time lapse between the date when the Computer Generated Report is received and the end of the previous reporting period, normal uranium burn-up would require licensee's to submit a statement of corrections.

The report should include a statement indicating that the data represents that information submitted by the licensee's as received at the end of the reporting period; therefore precluding the need for corrections due to uranium burn-up.

Very truly yours,

*R. L. Mittl*
