Mr. Tim Johnson  
Engineering Branch  
Division of Waste Management  
U. S. Nuclear Regulatory Commission  
Washington DC 20555

Reference: Topical Report "Results of a Test Program for the Solidification of Contaminated Waste Lubricating Oils"

Dear Tim:

Thank you for your continued patience regarding the completion of the above referenced report.

Recently, a company involved in nuclear waste management tested our oil solidification system for technical merit. The results were positive, so they are currently doing a market survey. If the system proves to be an economical solution to the problem, they intend to fully pursue it. If that is the case, we will complete the topical according to a schedule you will receive no later than June 28, 1985.

If we are not to go ahead, we will notify you earlier than the above date.

Sincerely,

*Bob Ward*
