JUL 12 1985

Docket No. 50-461

Illinois Power Company
ATTN: Mr. W. C. Gerstner
Executive Vice President
500 South 27th Street
Decatur, IL 62525

Gentlemen:

This refers to the announced preoperational physical protection inspection conducted by Messrs. G. L. Pirtle and B. Drouin of this office on June 6-14, 1985, of activities at Clinton Power Station authorized by NRC Construction Permit No. CPPR-137 and to the discussion of our findings with Mr. J. Perry and other members of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No items of noncompliance with NRC requirements were identified during the course of this inspection. The enclosed report does contain certain findings which must be corrected and/or resolved prior to fuel load. These findings will be reviewed during future preoperational inspections. No written response is required at this time.

A concern was noted during the inspection pertaining to progress in implementation of the Personnel Screening Program, particularly as it pertains to contractor personnel. Our concerns are addressed in Paragraph 12 of the report details. The Personnel Screening Program warrants increased senior management oversight.
