SUBJ: Revisions 9, 10 and 11 to SNUPPS  
QA Program for Design and  
Construction

Mr. R. D. Martin  
Regional Administrator, Region IV  
U.S. Nuclear Regulatory Commission  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76001

Docket Nos. STN 50-482, STN 50-483

Dear Mr. Martin:

This letter will confirm previous transmittals to Mr. W. D. Johnson, USNRC, Region IV, of a controlled copy of each of the subject QA program manual revisions. Controlled copies were also distributed to Mr. M. Johns, USNRC, Region III. These program revisions involve both the SNUPPS Standard Plant and the Callaway and Wolf Creek Site Addenda. The changes contained in the subject revisions involve organizational re-structuring, reassignments of personnel and organizational responsibility, updating of commitments to applicable Codes, Standards and Regulatory Guides and other clarifications and corrections considered minor in nature. In summary, the changes described in the subject revisions do not reduce the commitments in either Utility's quality program description from those previously reviewed and accepted by the NRC.

Please note that, with respect to Callaway Plant, the referenced document revisions are for record purposes only and merely serve to document the quality program in effect at the time of construction completion and operating license issuance.

If you have any questions regarding the referenced program submittals, please advise.

Very truly yours,

8507160593 850213
