J. M. Felton, Director
Division of Rules and Records
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: Freedom of Information Act Request

Dear Mr. Felton:

Pursuant to the Freedom of Information Act, 5 U.S.C. § 552, et seq., I request that you make the following information available to the Union of Concerned Scientists:

1. Please release all documents in NRC's possession discussing in any aspect the contents of the following publications:
 - a. Wyant and Minor, "Equipment Qualification Methodology Research: Tests of RTDs," NUREG/CR-3597, SAND84-0938, RV (September, 1984).
 - b. Craft, "Screening Tests of Terminal Block Performance in a Simulated LOCA Environment," NUREG/CR-3418, SAND83-1617, RV (August, 1984).
2. Please identify the model number and manufacturer of each resistance temperature detector whose testing is described in NUREG/CR-3596, and the model number and manufacturer of each terminal block whose testing is described in NUREG/CR-3418.
3. Please identify all nuclear power plants for which the components described in NUREG/CR-3596 and NUREG/CR-3418 have been ordered, or in which they are installed.
4. Please release the following information relating to the 1983 Annual Report by Sandia National Laboratories, which is attached to Board Notification 84-032 (February 13, 1984):
 - a. Please release all documents discussing the contents of the Sandia Annual Report.

- b. Please release all documents relating to the forty NRC, RIV inspections of qualification test efforts and facilities described in paragraph 1 of the Annual Report's Executive Summary.
 - c. Please identify the ten test laboratories, eight irradiation facilities, six manufacturers performing qualification activities, and two NSSS vendors described in paragraph 1 of the Annual Report's Executive Summary.
 - d. Please identify the test laboratory, irradiation facility, manufacturer, or NSSS vendor described in each "example" given in paragraph 2 of the Annual Report entitled "Summary of Technical Findings for FY 83 Activities." In addition, please identify each component model number and manufacturer where specific components are discussed.
 - e. Please release all reports of and documents discussing the following activities described in paragraph 3 of the Annual Report: technical reviews at Sandia of four qualification test plans; three EQIP program reviews with NRC, RIV staff; NRC Form 1.89 for the EQIP Program; program status reports; and any minutes of transcriptions of a seismic seminar.
5. Please release all documents in NRC's possession relating in any way to the following statements made in viewgraphs attached to Board Notification 84-032: "pressure for research not to impact licensing issue resolution;" "pressure for research not to impact previous licensing decisions;" and "pressure to resolve the problem today." In this regard, please include all documents describing specific instances in which Sandia officials perceived or experienced the above-mentioned pressures.

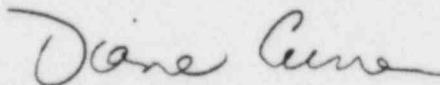

The Union of Concerned Scientists is a non-profit organization dedicated to the promotion of safety in nuclear power plant operation. The requested information will be used in these efforts, and will not inure to the benefit of any individual. Therefore, UCS requests that you waive any fees incurred in searching for or copying this information.
