Dear Mr. Donnelly:

On July 26, 1996, the NRC completed an inspection at your Big Rock Point Nuclear Plant. The enclosed report presents the results of that inspection.

During the 5-week period covered by this inspection, operations, maintenance, and engineering activities were generally performed in a satisfactory manner. Your staff has recently taken initiatives to improve work planning; however, based on observations pertaining to maintenance work on plant technical-specification-required equipment, continued attention is needed in this area.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room (PDR).

Sincerely,

James L. Caldwell, Acting Director
