Dear Mr. Holt:

Application materials for renewal of NRC License Number 12-13655-01, expiration date 5/31/85, program code: 03120, are attached in duplicate along with the renewal fee of \$120 as specified in 10 CFR 170 Section 170.31(3P).

Because of changes in program status (primarily personnel changes and the placement of several sources in locked storage), this renewal application is filed in its entirety. Specific changes are noted as follows:

Items #5 & #6:

- Seven (7) sources previously in active service (License Renewal dated 3/80) are now in locked storage pending disposal. These include sources previously located in the maleic anhydride plant and phthalic anhydride B decomposer.

Item #7:

- Updated to reflect changes in plant and corporate personnel.

Item #9:

- Updated to include additional pocket dosimeters and Geiger counters.

Item #10:

- Revised procedures including changes in contact personnel, new survey/report forms, and standard sources for counting efficiency determination.

Please contact me at 312/242-1720 should you need additional information.

Sincerely,

F. M. Spinola  
Plant Manager
