U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Cheryl Phillips

Subject: Amendment - NRC License No. 21-12535
Control No. 78185

Dear Ms. Phillips:

An amendment fee of \$120.00 is enclosed as required to amend our NRC license to change the language for the calibration of our radiation survey meters.

As indicated in our earlier correspondence (1/17/85), we are requesting that the language in our application be changed to read "at least one radiation survey meter be within the six month calibration period." This will permit ME&D the ability to ship one unit for calibration or repair, if needed, while maintaining at least one calibrated unit for lab radiation survey work.

Sincerely,

John Bozymowski
