License No. 34-03831-02

Gentlemen:

This refers to the special safety inspection conducted by Mr. R. J. Caniano of this office on June 26, 1985, of activities authorized by NRC Byproduct Materials License No. 34-03831-02, and to the discussion of our findings with members of your staff at the conclusion of the inspection. The results of the inspection were discussed on July 10, 1985, during a telephone enforcement conference between you and me and others of the NRC staff. The inspection was conducted because of a reported therapeutic misadministration and was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

No violations of NRC requirements were identified throughout the course of this inspection. However, our inspector expressed concern over the lack of formal procedures for brachytherapy administrations at your facility. You will be notified by separate correspondence of our decision regarding enforcement actions based on the findings of this inspection. No written response is required until you are notified of the proposed enforcement action.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

*J. A. Hind*
