Subject: Organization

As committed in our Quality Management System (QMS), Revision 1 regarding submittal to the NRC of changes, this letter provides notification of a change which extends the commitments contained in the QMS to the Westinghouse Government Technical Services Division (GTSD).

This change is intended to reflect implementation of the commitments contained in the QMS at GTSD. GTSD is a functional unit within the Westinghouse Government and Environmental Services Company (GESCO) performing the design, procurement, manufacture and use of radioactive material transportation packaging in accordance with 10CFR71. GTSD currently meets the commitments of the 10CFR50 program described in the QMS.

A relationship exists between ESBU and GESCO management to ensure that quality assurance program requirements are consistently applied and implemented. Meetings are conducted as necessary to discuss current issues and share information related to customer, regulatory, and internal quality assurance requirements. There is a regular exchange of information that includes management review reports, supplier audit reports, internal assessments, regulatory inspection reports, and sharing of any significant quality issues that could have an impact on ESBU / GESCO commitments. Quality assurance assessments and completion of corrective actions are the responsibility of the respective organization and its management. GESCO-GTSD is responsible for release of items and services supplied by GTSD.

This change has no impact on the commitments contained in QMS Revision 1.

This change does not affect the activities being performed or personnel performing the activities within the remaining organizations identified in the QMS organizational structure.

If you have any questions concerning the information in this letter, contact Meena Mutyala, Director ESBU Quality Systems at (412)-374-3220.

Very truly yours,

N. J. Liparulo, Manager
Regulatory and Engineering Networks
