Re: Amendment to license # 12-18658-01

Gentlemen:

We request amendment to license # 12-18658-01 to add an additional facility for use of radioactive materials:

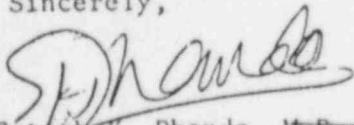

South Suburban Cardiology
17901 Governor's Highway
Suite 101
Homewood, Illinois 60430

A sketch of the above named facility is enclosed.

All nuclear medicine procedures will be performed with the Cardio-Med portable gamma camera in the area shown on the attached sketch. Precalibrated radiopharmaceutical doses will be transported from the Cardio-Med facilities as described in our current license application. There will be no overnight storage of radiopharmaceuticals at the new facility. We confirm a radiation survey of the area will be performed with a low-level gm meter according to procedures described in our current license application. The survey will be performed at the end of each day when materials have been used to verify no radioactive material or contamination is present, or left behind. We confirm the use of radioactive materials will be limited to authorized personnel or other ancillary personnel, as needed. If any ancillary personnel are needed to aid in performing any peripheral duties while nuclear medicine procedures are being conducted, they will be given radiation safety instructions as outlined in our current license application. Radiation levels to unrestricted areas will be maintained according to 10 CFR Part 20.105 limits.

Also attached is our check for \$120 to cover the amendment processing fees. We look forward to receiving the amendment document. Thank you.

Sincerely,

Satish K. Dhanda, M.D.
President

Dr. A. Paredes, M.D.

Dear Dr. Dhanda:

This is to confirm authorization for Cardio-Med., Ltd to perform nuclear medicine studies at my 17901 Governor's Highway, Suite 101, Homewood, IL facilities upon obtaining proper NRC and IDNS radioactive material license documents.

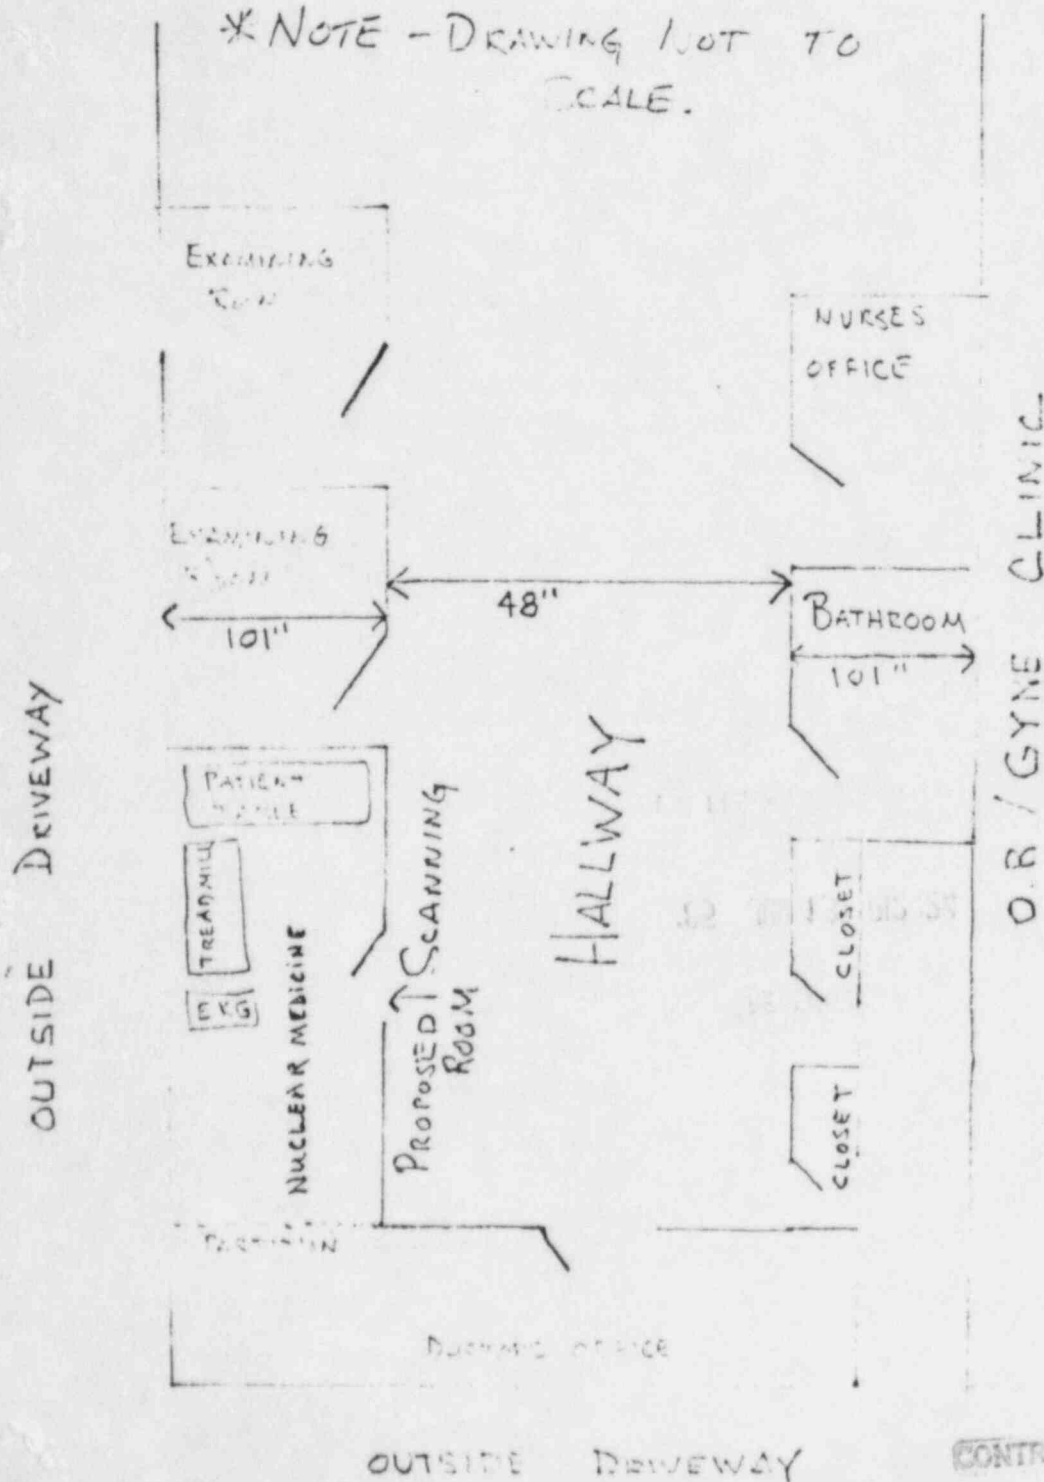

Sincerely,

A. Paredes, M.D.
