RESERVOIR DIVISION

C. C. MATTAX
MANAGER

April 29, 1985

U.S. Nuclear Regulatory Commission, Region IV
Material Radiation Protection Section
611 Ryan Plaza Drive, Suite 1000
Arlington, Texas 76011

Subject: Renewal of NRC License #42-10930-02

Gentlemen:

We do not wish to renew our Nuclear Regulatory Commission license #42-10930-02 issued to Exxon Production Research Company. We have had this license for a number of years in anticipation of possible field tests using tritiated water as a tracer in oil or gas wells. No such use has occurred, and consequently it will be to our mutual benefit that this license be terminated.

No radioisotopes have been purchased, stored, or used under this license. We have a Texas State Health Department license under which our radioisotope program at our Houston facility is operated.

If you have any questions relating to this license termination, please call our Radiation Safety Officer, Dr. W. A. Hoyer (713-965-4478).

Very truly yours,

C. C. Mattax, Chairman
Radioisotopes Committee
