

Mr. Dan Noss
Siemens Power Corporation
2101 Horn Rapids Road
Richland, WA 99352

SEP 20 1996

Dear Mr. Noss:

A review of our active licenses found that Siemens Power Corporation holds specific export license XCOM1099 which authorizes the export of 15 stainless steel fuel assembly tie plates to Finland for use in the T.V.O. Olkiluoto Nuclear Power Plant Unit 1.

In a recent amendment to our export and import regulations in 10 CFR 110, NRC added Finland as a country to which any person or company may export nuclear reactor components under general license authority. That is to say, Siemens Power Corporation no longer needs an NRC specific license to enable exports of reactor components to Finland.

As a result, the NRC is terminating export license XCOM1099 and requesting that all future exports of specially designed and prepared reactor components to Finland be made under the general license authority in 10 CFR §110.26.

I have enclosed a copy of the July 8, 1996 Federal Register notice which announced the most recent changes to our export regulations, including the revision of §110.26. I have also enclosed an updated copy of 10 CFR 110 for your use.

If you have any questions, please call me, or Betty Wright, at (301)415-2344.

Sincerely,

Original signed by
