Gentlemen:

This refers to your application dated May 6, 1985, concerning an amendment to the Model No. OH-142 package.

In connection with our review, we need the information identified in the enclosure to this letter.

The additional information requested by this letter should be submitted in the form of revised pages to your application within 90 days from the date of this letter. If you have any questions regarding this matter, we would be pleased to meet with you and your staff.

Sincerely,

Original Signed by
CHARLES E. MACDONALD

Nuclear Packaging, Inc.
Model No. OH-142 Package
Docket No. 71-9073

Encl to ltr dtd: MAY 31 1985

GENERAL

Provide Page No. 1-90 which is missing from our copies of the application.

CONTAINMENT

For a leak rate greater than 10^{-5} atm cc/s (see Condition No. 9 to Certificate of Compliance No. 9073).

1. Establish containment requirements on the basis of material dispersibility. Solid metals or oxides may have dispersible surface contamination or may generate dispersible particles. These potential sources of dispersible material must be taken into account or demonstrated to be non-existent.
2. Establish test procedures and acceptance criteria for containment of dispersible radioactive materials.

QUALITY ASSURANCE PLAN

Delete current Section 8.0 of the application. Reference should only be made to your currently approved quality assurance plan (Docket No. 71-0192). Section 8.0 includes details that should not be included in the individual package docket. (In addition, the program is outdated, i.e., references to Appendix E of 10 CFR Part 71 and NUPAC organizational structure.)
