Subject: Revision 3 of Hydrogen
Control Program Plan

Reference 1: Letter HGN-024 from S. H. Hobbs to Mr. H. R. Denton
dated December 14, 1984.

Reference 2: Letter from Mr. R. M. Bernero to Mr. S. H. Hobbs
dated April 2, 1985.

Dear Mr. Bernero:

Reference letter 1 transmitted the Hydrogen Control Owners Group's (HCOG) Hydrogen control Program Plan to the NRC staff. HCOG has completed revision 3 of the Hydrogen Control Program Plan and has enclosed 24 copies of the revised pages. This revision addresses NRC's comments delineated in Reference 2 as well as NRC's concerns raised during the May 22, 1985 HCOG/NRC meeting. The revision also incorporates modifications to the subtask descriptions, task networks, and milestone schedule. These modifications refine, reflect status changes, and add several subtasks. The new task network reflects these changes. Typographical and grammatical errors have also been corrected.

Major changes are noted by a change bar followed by the revision number, for example "13". In addition, each changed page has a revision date in the lower right hand corner. Also included with each copy is a set of instructions for replacing pages in the current program plan. The instructions are based on the assumption that Revisions 1 and 2 of the program plan transmitted to Mr. R. Bernero from Mr. S. H. Hobbs in letters dated February 19 and 28, 1985, have been inserted into your copies.

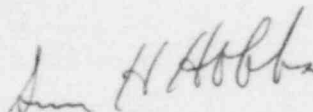

HCOG is presently performing the scoping tests discussed in subtasks 9.17 and 9.18 of the Hydrogen Control Program Plan. Any modifications to the scoping test program will be discussed with the NRC in a meeting to be held on July 17, 1985.

This submittal was compiled by HCOG from the best information available for submittal to the Nuclear Regulatory Commission. The submittal is believed to be complete and accurate, but it is not submitted on any specific plant docket. The information contained in this letter and its attachments should not be used for evaluation of any specific plant unless the information has been endorsed by the appropriate member utility. HCOG members may individually reference this letter in whole or in part as being applicable to their specific plants.

Very truly yours,

Sam H. Hobbs, Chairman
Hydrogen Control Owners Group
