Beth A. Riedlinger  
Health Physicist (Licensing)  
Nuclear Materials Safety Section  
United States Nuclear Regulatory Commission  
Region V  
1450 Maria Lane, Suite 210  
Walnut Creek, CA 94596

SUBJ: Docket No. 030-19828  
License No. 36-21137-01  
Control No. 18607  
Application for Material License Amendment dated December 17,  
1984 and your Request for Information dated February 22, 1985

1. It is unfortunate that a mix-up has occurred in the handling of information from this Medical Center to the Nuclear Regulatory Commission. As you will see from the enclosed correspondence, this request was started in July 1984. On February 22, 1985, Francis A. St. Mary asked for further information. The request was answered on March 12, 1985. (See attached)
2. Apparently the jurisdiction for the Nuclear Regulatory Commission was transferred to you without our being aware of the change. We are extremely anxious to meet the requirements and secure your approval so that our Nuclear Medicine Laboratory can continue to perform vitally needed service. In the hope that this matter can be cleared up promptly and successfully, we are forwarding by registered mail the information sent to your Washington D.C. office.
3. Now that we have the correct address for Region V, be assured we will send all communications to you. If you have any questions please call the Chief of Staff, Dr. A. Gerson Hollander, FTS 422-4287.

  
PERRY C. NORMAN  
Medical Center Director
