COMMENTS:

I agree with the comments made by Chairman Jackson and Commissioner Dicus and approve the staff's recommendation provided that the Federal Register notice is revised to include a discussion and request for comments on what balance the NRC should strike between a performance-based and prescriptive approach to regulating broad scope licensees. In the specific context of regulating such licensees, the discussion should state what NRC means by performance-based regulation and prescriptive regulation and should identify the principal issues associated with each of these regulatory approaches.
