URFO:GRK
Docket No. 40-8926
SUA-1492, Amendment No. 5
04008926250E

State of Wyoming
Department of Environmental Quality
ATTN: Dennis Hemmer, Director
210 Lincoln Street
Lander, Wyoming 82520

Dear Mr. Hemmer:

Our office is in receipt of an August 3, 1989 amendment request from Mr. Moxley of your Lander office. As we understand the request, the State of Wyoming has secured bids for the final decommissioning work at the Bison Basin site. The bids include utilizing contractors in the fields of radiological surveys, fence removal, decommissioning, earthwork and revegetation. The contractors that will be involved in the radiological surveys and the decommissioning work have demonstrated that they are qualified to assure radiological safety.

The projected time table as shown in the above cited document, indicates that sufficient time has been set aside for decommissioning of the evaporation ponds and the building slab. Following these activities and prior to regrading and topsoiling, please contact Mr. Konwinski of my staff to allow for completion of post-decommissioning radiological surveys.

In consideration of the above discussion and your August 3, 1989 submittal as well as pursuant to Title 10, Code of Federal Regulations, Part 40, Source Material License SUA-1492 is hereby amended by revising License Condition No. 10 to read as follows:

10. The authorized use shall be for decommissioning and decontamination in accordance with the Department of Environmental Quality submittal dated August 1989.

All other license conditions shall remain the same. The license is being reissued to incorporate these modifications. The effect of this amendment is to authorize facility decontamination and decommissioning.
