Hereby certifies that

Henry H. Chong, M.D.

has successfully completed the 200 Hour Physician Training
Program in Basic Radioisotope Handling conducted
in accordance with the requirements of the
U.S. Nuclear Regulatory Commission (10 CFR 35).

COURSE OUTLINE

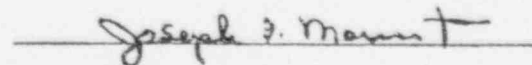

Radiation Physics and Instrumentation - 100 hours
Mathematics pertaining to the use and measurement of radioactivity - 20 hours
Radiopharmaceutical Chemistry - 30 hours
Radiation Biology - 20 hours
Radiation Protection - 30 hours

To whom it may concern,

In Reply Refer To:

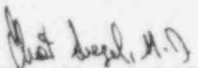

This letter is to affirm that Henry H. Chong, MD gained clinical experience at The Baltimore VA Medical Center and University of Maryland Hospital in nuclear cardiology. His experience began July, 1993 and continued until May, 1996. During this period Dr. Chong participated in 645 stress Thallium studies and 115 radionuclide ventriculography studies (Technetium labeled red blood cells).

During this time period Dr. Chong's participation consisted of:

- 1) Examination of patients and reviewing their case histories, determining the suitability of radioisotope diagnostic studies and the recommendation for prescribed Thallium or Technetium dosage.
- 2) Direct supervision of the exercise test.
- 3) Collaboration in dose calibration and actual administration of dose to the patient, including calculation of the radiation dose, plotting of the data.
- 4) Performing checks for proper operation of survey meters.
- 5) Ordering, receiving, unpacking, and disposing of radioactive materials safely.
- 6) Performing the required radiation surveys.
- 7) Using procedures to contain spilled radioactive materials safely, and using appropriate decontamination techniques.
- 8) Interpretation of these studies.

The hours of training in nuclear cardiology, both clinical and work experience exceed 500 hours each, for a total of greater than 1,000 hours. In summary, Dr. Chong has trained for an adequate period to enable him to manage radioactive patients and to follow them through their diagnostic nuclear cardiology procedures. I recommend him for licensure to receive, handle, and administer Tc-99m and Tl-201 in conjunction with cardiac nuclear medicine procedures, and for privileges to order, monitor, and interpret these studies in a clinical setting.

Sincerely yours,

Eliot Siegel, MD
