Penn Inspection Company
ATTN: Wade Penn
Route 3, Box 311
Chickasha, Oklahoma 73018

Gentlemen:

This refers to your application dated December 21, 1984, to amend your license for use of sealed sources and devices for industrial radiography. We have completed review of your application and have the following comments and need for additional information:

1. We cannot authorize Earl Hixon to be Radiation Safety Officer unless he has at least one year of radiography experience using radioactive materials. If Mr. Hixon has this experience, indicate the name of the licensee, the license number, and the duration of his assignment as a radiographer under that license.
2. In regard to your request to add SPEC source assembly Model G-1 to your license, indicate the manufacturer and model number of the source changer if you plan to use one with this source.
3. Your current license is issued in the name of Penn Inspection Company; however, the letterhead of the correspondence submitted to us identifies your firm as Big State X-Ray. Identify the correct name of your firm and the circumstances whereby the name may have been changed.

We shall continue review of your application upon receipt of the information and revisions requested above, in duplicate.

Sincerely,

Original signed by
C. L. Cain
