MAY 24 1985

Normandy Osteopathic Hospital
Nuclear Medicine
ATTN: Robert S. Davis, III
Administrator
7840 Natural Bridge Road
St. Louis, MO 63121

Gentlemen:

Enclosed is Amendment No. 42 to your NRC License No. 24-04584-01 in accordance with your request.

Please note that David E. Gideon, D.O. has not been added to the license at this time. It appears that he will be well qualified for use of Groups I, II and III at the end of July 1985. Please resubmit your request at that time.

Please note that Mark Anderson, D.O. has not been added to the license at this time. He appears to be well qualified for in vitro laboratory procedures. However, to be added for procedures in Groups I, II and III he must document an additional 50 hours training in radiological physics and instrumentation (for a total of 100 hours); must document or obtain training with additional nuclear medicine imaging procedures, Mo99 generator elutions (5) and 5 procedures preparing reagent kits; and must have these procedures supervised by and signed for by an M.D. or D.O. who is himself authorized to perform the procedures.

Information submitted in response to this letter should state that it is additional information and not a new amendment request. If you have questions, please contact our office by dialing (312) 790-5625.

Sincerely,

Original Signed By
Evelyn R. Matson
Materials Licensing Section
