Dear Ms. Wassler:

Enclosed please find a copy of the requested letter dated November 30, 1983. The attached copy of the submitted map was indeed superseded with a map dated May 23, 1984.

If you require further information contact Ms. Ogle or myself.

Sincerely,

Jim Finley
Hydrologist

Re: Letter Dated: 24 January 1984

WDEQ-LQD Permit #9RD
USNRC Amendment

Copy: Mr. Glen Mooney - District Geologist

Dear Mr. Randon:

In response to a letter received from Mr. Glen Mooney concerning the recommendations to Uranerz's USNRC amendment the following comments are for information and file:

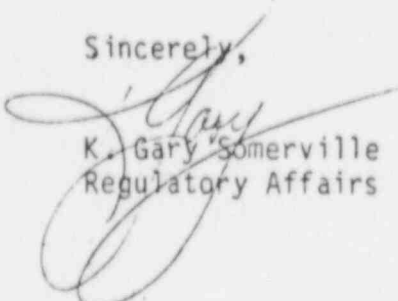

(1) Objective - UUS has modified its goal and target for groundwater restoration to be that of "baseline". This is a change from the license document that included a water classification goal and has been agreed to by both UUS and the USNRC project manager, Mr. Ed Hawkins.

(2) Stream Flow Analysis - UUS also agrees that more water quality data would be necessary and they have increased the number of Guideline #8's to be analyzed. This has also been discussed with the USNRC and everyone is in agreement.

(3) Well Field Sampling - Attached to this letter is a drawing of the wellfield and a new mix of recovery and injection wells to be sampled. This new pattern is one that both the environmental and operational staff of UUS feel will supply sufficient data to indicate the success of restoration.

Should you or your staff have any questions or need additional information, we will be happy to supply it upon request.

Sincerely,

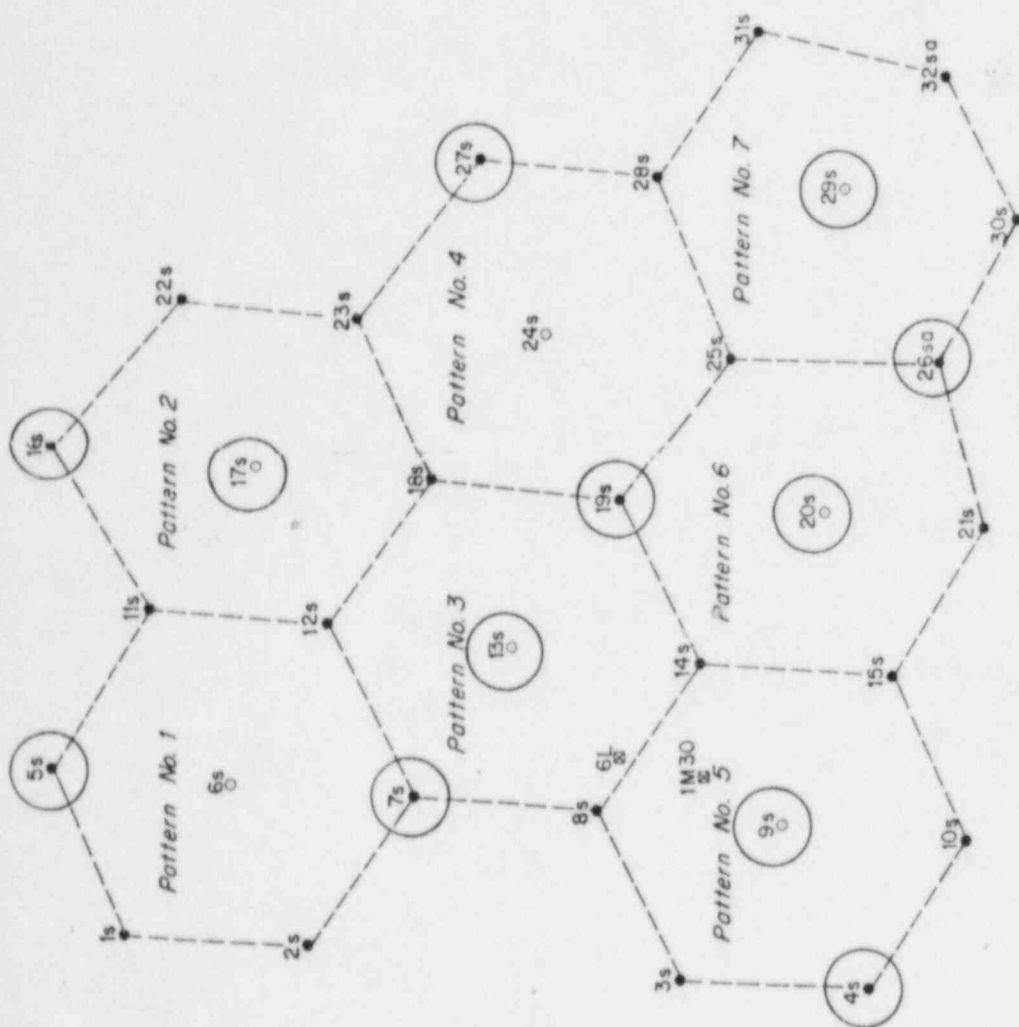

K. Gary Somerville
