Nuclear Regulatory Commission  
799 Roosevelt Road  
Glen Ellyn, Illinois 60137

Subject: Additional information for  
License Renewal Control Number 77752

Gentlemen:

We are sorry for any inconvenience that may have occurred. A letter covering the information requested supposedly was sent December 12, 1985. I will restate the information:

1. Title: Wayne Burgard, Assistant Superintendent
2. Outline of Training:
  - a. No specific training by Texas Nuclear. All training by Greg Lofstedt who has prior experience from another Cargill location.
  - b. Our Policy with regards to maintaining and adjustment of the instrument is to have all work performed by trained personnel from Texas Nuclear. Therefore we are allowed only to operate the device.
  - c. We have a specific policy, stated in the original application. These are covered in sections 12, 13, and 14 of the application addendum.
  - d. We have also decided to perform a leak test annually instead of every three years as required.

I hope this meets with your requirements and again sorry for any inconvenience.

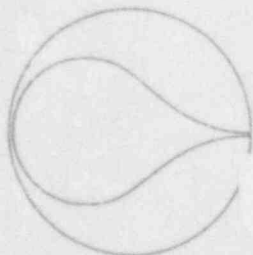

Sincerely,

Wayne Burgard  
Assistant Superintendent
